

Projects in G.C.C.

Our business model is built on a straightforward proposition: to work across projects where we can make a difference in terms of quality of the built project for the end user.

Given that each market has its own opportunities, regulations and constraints, we have the ability and flexibility to adapt our delivery methods to the needs of owners, developers, and public authorities, offering the following services:

- **Design-build:** under this method, we guide the project from concept to completion, acting as a single point of contact with the client for planning, design and construction.
- **General contracting:** we offer procurement and construction services, self-performing demolition and excavation works, concrete, shoring and carpentry works, and managing sub-contractors as needed.
- **Construction management:** we provide planning, coordination and control and supervise execution throughout the whole construction process.

We are able to undertake projects for both public and private clients in diverse market sectors with a focus on:

- > **Residential housing construction**
From villas to high-rise developments.
- > **Commercial building construction**
From office buildings to industrial plants.
- > **Hospitality and leisure construction**
From hotels and resorts to restaurants and sports clubs.
- > **Infrastructure**
From underground utilities to power plants, roads and bridges.
- > **Rehabilitation**
Including interior and exterior renovation.
- > **Marine works**
Including ports, wave breakers, dams, and artificial lakes.

FTTX FIBER OPTIC NETWORK

LOCATION

Beirut, Mount Lebanon, Bekaa, South | Lebanon

CLIENT
OGERO

CONSULTANT
Khatib & Alami

PROJECT HIGHLIGHTS

Supply and installation of the full fiber optic distribution network in Beirut, Mount Lebanon, Bekaa and South area.

A total of 9,000 km of cables are being installed across 147 cities.

SCOPE OF WORK

All passive works, from survey, to civil works, cabling, splicing, terminating and testing.

ALMESSILA COMPOUND

—
LOCATION
Doha | Qatar

EMPLOYER
P.E.O. (Qatar)

PROJECT HIGHLIGHTS

As part of a development of six villas on a plot of 35,880 sqm, 4 villas have been designed and built by Get on a turnkey basis. The built-up area for each villa is approximately 5,000 sqm.

SCOPE OF WORK

Alongside the villas themselves, work included landscaping and construction of a boundary wall, and external guard house, and 4 separate substations and generators.

COAST GUARD LANDSIDE

—
LOCATION
Doha | Qatar

CLIENT
P.E.O. (Qatar)

PROJECT HIGHLIGHTS

Construction of a new Coast Guard Base for the Qatari Coast Guard. On a 64 hectares plot, the landside development comprises multiple facilities including maintenance and operational workshops for the marina, offices, a mosque, residential accommodation, sports and recreational facilities and training facilities.

SCOPE OF WORK

General construction, security systems and all infrastructure.

SHEIKH FAHED VILLA

—
LOCATION
Doha | Qatar

CLIENT
P.E.O. (Qatar)

PROJECT HIGHLIGHTS

Located on a 60,000 sqm plot, this visionary project consists of a villa, a private majlis, a public majlis, a spa and swimming pool and staff buildings.

SCOPE OF WORK

Renovation of 40,000 sqm on a turnkey basis along with infrastructure works, external roads and landscaping.

JASSRA HOTEL

—
LOCATION
Doha | Qatar

PROJECT HIGHLIGHTS

A touristic hotel consisting of 2 buildings essentially. With a built-up area of 18,000 sqm, the first building houses 38 individual rooms and 23 suites, in addition to a restaurant, a gym and a spa on 3 floors.

With a built-up area of 10,000 sqm, the second building houses individual rooms and 14 suites over 3 floors.

SCOPE OF WORK

General construction.

SWIMMING SMAISMAH

—
LOCATION
Doha | Qatar

CLIENT
P.E.O. (Qatar)

PROJECT HIGHLIGHTS

Construction of 3 beaches to enhance the quality of life of the local community and help develop tourism.

The task involved dredging the swimming area measuring 9 km long, 575 m wide and 1.8 m deep, importing beach sand, constructing groynes and breakwater to stabilize the sand and constructing seating areas for family leisure. The result is a continuous beach roughly 9 km long and 80 m wide.

SCOPE OF WORK

Design and build.
