- . Batroun Public Hospital / Build up Area: 500 square meters / Budget: 2.5 million USD
- . MHM Hospital / Build up Area: 70,000 square meters / Budget: 75 million USD

Our Healthcare projects are supported by an expert team of professionals specialized in various biomedical engineering disciplines, health facility planning, healthcare IT and healthcare project management. They are well trained and continuously updated. Their expertise covers the wide spectrum of advanced medical technologies and all levels of related support functions. They have acquired extensive knowledge and experience in procurement management, supervision and commissioning..

**Medical Design Development, Review & Auditing Combines both:
National and Prominent International Standards & Guidelines
&
Activity Based Design**

ACG for Contracting is your partner all along the road of healthcare, it will help you plan a new facility or re-visit the plans of existing ones. Our ultimate aim is to help you achieve a world class patient focused healthcare environment with state of the art technologies that are upgradable along a program that guarantees non-obsolence.
